

COEO Hospitality Phone Systems

Better Connections by Design

5-Star Communications Solutions for Seamless Hospitality Operations

Communications with your guests, staff, and properties should enhance hospitality operations at every touchpoint. COEO's hospitality phone systems are built to meet the unique needs of hotels, resorts, and lodging facilities of all sizes. Get seamless voice communication, room-to-room calling, front desk tools, and full integration with your Property Management System, plus our 24/7/365 support for a 5-star experience!

Seamless Communications for Unforgettable Experiences

Managing hundreds of guests, staff members, schedules, and day-to-day operations across multiple locations requires streamlined communications tools. COEO's hospitality phone systems offer all the tools you need in one place, improving workflows and enhancing experiences.

Full PMS Integration

Fully integrate property management systems including Oracle OPERA, Micros Fidelio, and any FIAS-based PMS platform. Automate room status updates, wake-up calls, check-in/check-out sync, and minibar billing from a centralized communications platform.

Scalable & Cost-effective

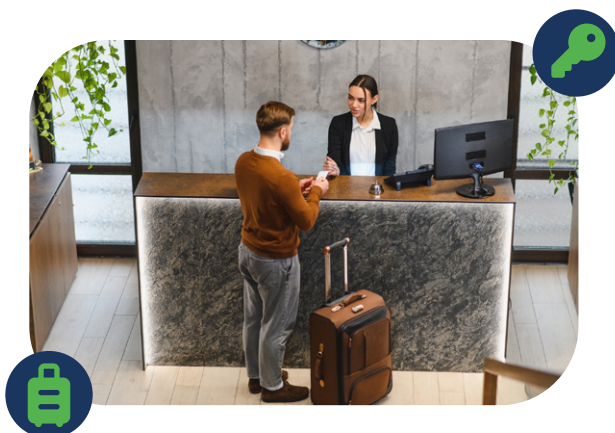

Scale communications easily for 50-room boutique hotels to 500+ room franchises with a flexible licensing model based on concurrent call sessions. We adapt our hospitality phone systems to your properties and call volumes, ensuring cost-effective communications.

Guest Room Telephony

Get reliable, high-quality IP-based in-room calling, voicemail, and Do Not Disturb (DND) settings while maintaining the brand standards of global hospitality chains. We also ensure your systems are secure and compliant with regulations including Kari's Law and RAY BAUM's Act.

Front Desk Features

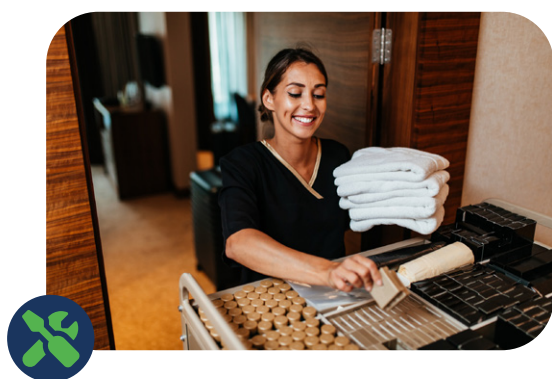

Streamline guest experiences at the front desk with an intuitive interface that requires minimal training. Reception and concierge staff can manage wake-up calls, housekeeping status, call logs, and guest messaging all in one place.

Multi-Property Support

Manage multiple brands and locations with a single communications solution. Replicate standard configurations and tailor features by location for flexible, streamlined operations that are easy to implement across properties.

Housekeeping & Maintenance

Extend your COEO platform with iReadyRooms, a mobile-friendly module that puts real-time room assignments and maintenance tickets right in your staff's hands, no app download required. Housekeepers track cleaning progress, charge minibar items, log lost and found reports, and submit AI-powered room inspection photos, while maintenance teams create, assign, and resolve tickets by location, all from their phone or tablet.

Communications That Impress with Customization & 24/7/365 Support

Wow your guests with a hospitality phone system that streamlines operations and empowers staff. COEO specializes in customizing our complete ecosystem of communications solutions to meet the needs of each customer, including fully managed solution implementation and ongoing 24/7/365 support.

Get 5-star communications and the VIP treatment with a hospitality phone system from COEO!
